OUR MAJOR CLIENTS

The foundation of our success is built upon the partnerships we have created with our customers through quick response, and by providing appropriate and innovative solutions enabling our clients to serve their customers effectively, and thereby providing returns on their investment. Some of our major clients are listed below.

SERVICES

Interactive integrates and implements technology to achieve e-business, Web presence, intranet and extranet collaboration, media management, and process automation so powerful your business can practically run on autopilot.

We have been serving the market for the past 8 years. With over 100+ customers, Interactive is a leading and well established player in this market.

Our services are tailored to your needs with optimized processes that use the latest technology innovations alongside a team of seasoned technical consultants and business analysts. We offer value far exceeding any competition. Here is a glimpse of the solutions we offer -

1 Web Application development

Application development outsourcing process ensures that geography no longer poses a hurdle to limit the web services to any extend. Our custom made solutions and applications give you a consistent edge over competition, address gaps in the functionality provided by commercial packaged applications emphasizing the aspects of the business process unique to your business.

By putting a fanatical focus on "ease of use" we design the user interface of the applications in the way that the users will expect without having to think about it. This approach enables the users to benefit from what the application has to offer in the shortest amount of time possible. This way we make sure that the users will have a pleasant experience while using the application so that they use it more often

2 Web Designing

Professional web design and HTML template design are all a propos creating a great website is what we offer our clientele. Our conceptual effort in creating a website design with a live look and awesome effect has a perfect outlook.

Over the last 13 years we have designed & developed website and ecommerce solutions across a wide range of markets, catering for varied outcomes and objectives. We understand the importance of your website, creating you an online presence that is as unique as your business.

The key features of website designing are listed below:-

- ✓ **Page loading efficiency**
- ✓ **Enhanced graphics design**
- ✓ **Web Usability**
- ✓ **Consistent navigation**
- ✓ **Perfect visualization**
- ✓ **Responsive Designs**

3 Software Development

iANTZ in-house, cutting-edge software development team builds bespoke solutions to improve efficiency, productivity, insight and profit, as well as solve system, integration, data and software issues. Our solutions incorporate functionality that enables your staff to transact business quickly, accurately and with a customer-orientated focus.

We recognise that business processes need to be efficient, integrated and relevant. We work with you to streamline your business processes by developing and deploying tailored solutions to meet your needs. We also specialise in turning data into meaningful and intelligent business insight so that you can fine tune your business model and compete more effectively

4 Mobile Application Services

It's vital to have the shortest possible gap between your initial idea and a working app. Our unique, cutting-edge software develops mobile apps 4X faster than our rivals. Cross-platform development tools also allow an app created for one system to be ported to any other mobile platform. iAntz keeps you in track with the technologies of application development for android, iPad, iPhone. We design and build a significant iOS application for these platforms. Our deep technical expertise in building Android SDKs keeps your data and your customers safe.

5 Web Hosting

We are the leading web hosting service provider who offers lots of different features with 100% client satisfaction. We offer fast, simple and affordable globally available domain name registration in India and on-time renewal plus web hosting services. Make avail of the services we offer at the best rates in the industry.

6 SEO Services

Whatever your business and your presence on the Internet, and no matter whether you're selling on a local, national, or even global level, if you want it to succeed, Search Engine Optimisation needs to be as important a part of your marketing efforts as everything else you do.

Search engine optimization will make sure that your business is ahead of your competitors and come to the attention of quality clients looking for what you have to offer. iAntz IT Solutions is a prominent SEO service provider in India focusing on internet marketing for small and medium sized business worldwide

7 Branding

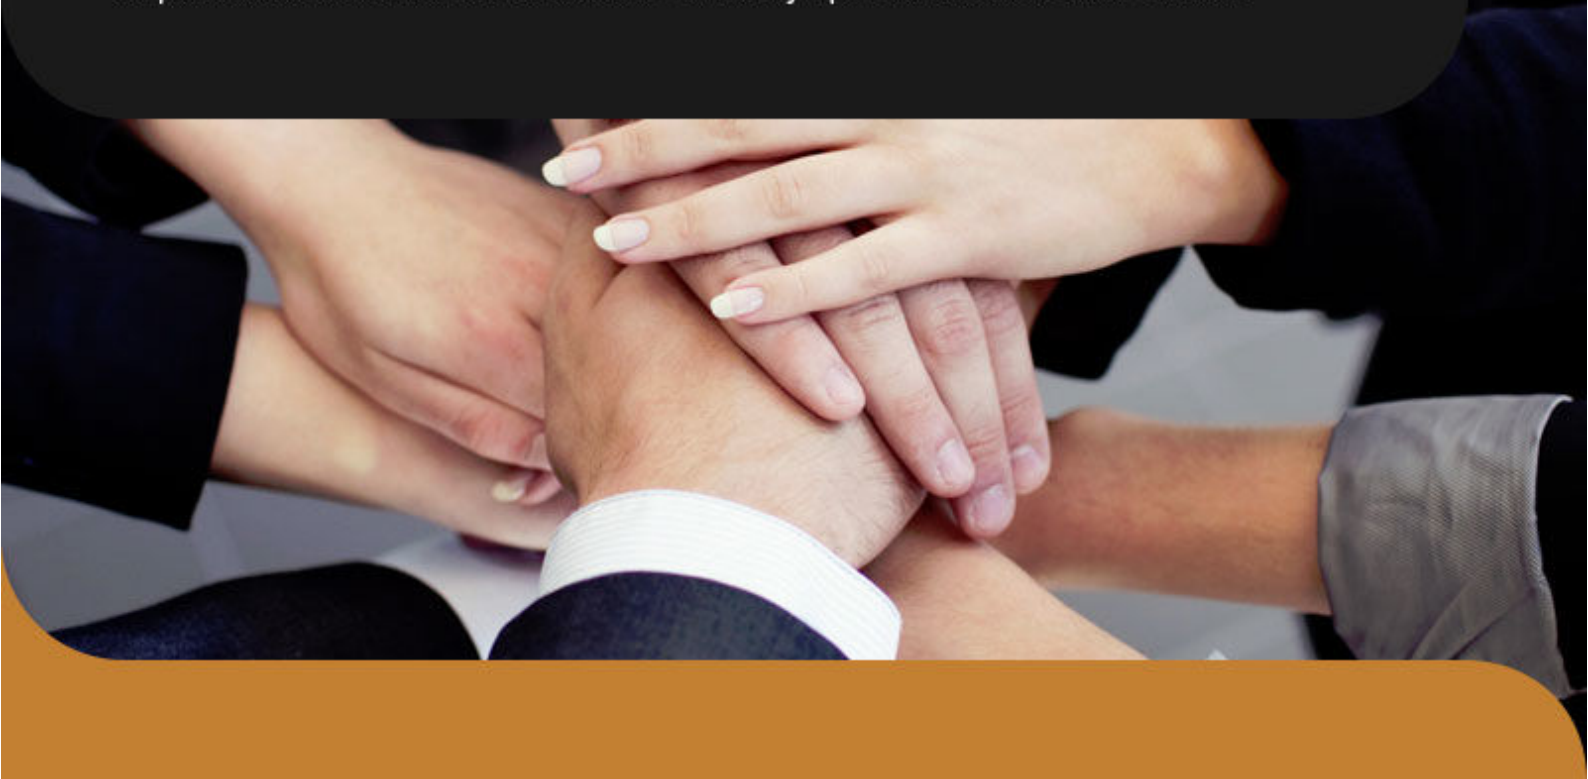

We build brands that can grow with you, underpinning the core values and essence of your company, product or service. Brands that enable you to communicate to your audience with a unique personality across all channels.

Our experience providing branding services to companies large and small gives us a unique insight into various industries. We design brands from scratch, providing high-quality and long term corporate identities. Our design capabilities extend to brand collateral; from brochures to business cards and banners, we implement your corporate identity and campaign designs into all print media.

What makes our approach unique? We don't just give you a logo; we consider what will work for your company. That means we do our research, understand your business and produce a brand identity that will guide your company to the future.

8 Web Content Management

Enterprise portals provide a 'dashboard' that brings together many different business functions in one place, allowing employees, administrators and trusted outside parties to access information and applications with a single sign on. We offer a range of products and services to meet the industry specific needs of our clients.

COMPREHENSIVE PRODUCT & SOLUTIONS PORTFOLIO

Delivered to the highest technical standards using the latest software development techniques and methodologies, we can complete projects to a tight deadline and within budget.

Effective Content Management System solutions by iAntz will reduce your company's operating costs and enhance customer service. In addition, your sites will always be up-to-date that will help you gain leadership with your internet presence and the prosperity of your business. With our CMS, companies control not only the current web site's content, but also have a tool to implement their own ideas. They will manage navigation, web site structure, dynamic elements, tables and web-forms. These tools help them easily create pages on the web site in the way they want and place them online in real-time without specialists' help.

Web content management systems are often used for storing, controlling, versioning, and publishing industry-specific documentation such as news articles, operators' manuals, technical manuals, sales guides, and marketing brochures.

iBilling

iANTZ IT solutions provides a wide range of billing and ERP solutions for its customers as tailor made. We have successfully developed and implemented iBilling as a complete web based integrated billing and inventory support application for our clients. Few major modules of ibilling are Order Management, Purchase Management, Sales Management, Inventory management etc.

The screenshot displays the iBilling web application interface. At the top, there is a navigation bar with tabs for Inventory, Order, Purchase, Sales, Masters, Admin, and Reports. Below this, a header section shows the user's role as 'Administrator @ Outlet 1' and provides links to 'My Dashboard', 'My Account', and 'Logout'. The main content area is titled 'Purchase - Add Purchase' and contains a form with fields for 'Order No.', 'Supplier Code', 'Supplier Name', 'Payment Type', 'Date of Payment', and 'Payment Details'. A 'Back' button is located in the top right corner of the form area.

iWorkSync-AD

iWorkSync AD is a fully-integrated workflow management product, specially designed for the media industry. iWorkSync AD helps you to serve customers better and more profitably through automating your business process across all divisions.

iWorkSync AD delivers benefits across key areas of a company's operations by synchronizing processes, streamlining the flow of information and functioning in real time by integrating functions of various resources including accounts, production, media and sales.

This facilitate to manage major problems like release order management, recurring release orders, tracking sub-contractors, preparing a single bill for multiple releases across varied media, etc.

The screenshot displays the iWorkSync-AD web application interface. At the top, there is a navigation bar with tabs for Transactions, Masters, Reports, and Administration. Below this, a header section shows the user's role as 'ECADS' and provides links to 'My Account', a help icon, and a refresh icon. The main content area is titled 'Job Entry List' and contains a table with columns for 'Client Code', 'Job Type (Category)', 'Job Title', 'Done By', 'Done on', and 'Action'. A 'Filter By' dropdown menu is set to 'Pending - 2', and a 'Search' input field is provided. A red 'Add' button is located in the top right corner of the table area.

A Human Resources Management System (HRMS), refers to the systems and processes at the intersection between human resource management (HRM) and information technology. It merges HRM as a discipline and in particular its basic HR activities and processes with the information technology field, whereas the programming of data processing systems evolved into standardized routines and packages of enterprise resource planning (ERP) software.

iHRM encompass - Employee Management, Time and attendance, Leave Management, Payroll, Performance appraisal, Recruitment, Employee self-service, Assets Management.
